

 FERUS

WHO WE ARE

FERUS is a full-service, vertically integrated manufacturer of leather goods and accessories.

Our number one goal is to meet and exceed our customer's expectations.

The FERUS business model provides solutions for product design, development, raw material sourcing, manufacturing and logistics.

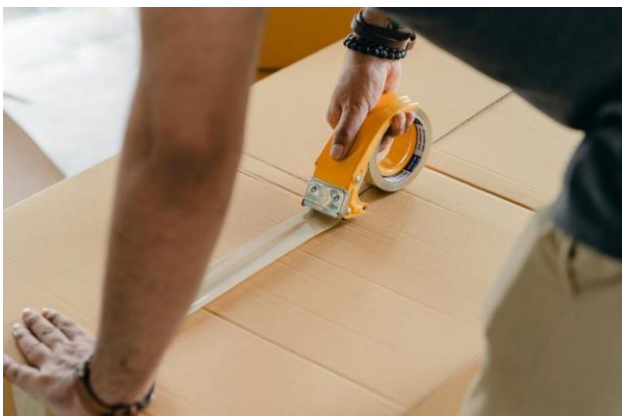

DESIGN

From the early design stage we ensure that quality is the top priority. Our creative team works closely with designers, product managers, and buyers to turn your ideas into reality.

MANUFACTURE

Experience and knowledge is what our artisans deliver each day in order to produce the best luxury leather goods. Our team is committed to excellence in quality and delivery time. We consistently deliver high quality products on time, tailor made to the customer needs and meeting target prices.

SOURCING

Our suppliers are from all over the world so we can offer our customers the products they need. Our team has a reliable relationship with all our suppliers that guarantees a sustainable supply chain

LOGISTICS

Wide experience exporting all over the world. International shipping and 0% tax fee to USA and Canada (USMCA)

THE SHOWROOM

The place where ideas become reality!

With inspiration from Mexican contemporary art and design, we created a space where ideas become a reality. The showroom is fully equipped with resources that help us create the most challenging designs.

We welcome you to visit this incredible space to get inspired and learn more about all our design developments.

THE HERITAGE

FERUS is a division of Treviño Leather Group, the largest tannery in Mexico with more than 80 years in the industry.

We have established ourselves as a leading Mexican brand operated by artisans with many years of experience in the industry and whose work shows the perfect union between craftsmanship and creativity.

- 
- LAREDO, TX (Warehousing and Fulfillment Center)
 - MONTERREY, NL (Headquarters)

Our headquarters are located in Monterrey, Nuevo Leon - Mexico. This strategic geographic location, only 2 hours south of Laredo, Texas – USA, provides market proximity and makes us the ideal partners for product sales in the United States in conjunction with the benefits of the USMCA trade agreement.

WHAT WE DO

FERUS provides the convenience of a one-stop shop for clients that covers the entire process of leather manufacturing from start to finish with a Total Value-Added Package that includes:

- PROTOTYPE & DESIGN
- PRODUCT DEVELOPMENT
- SOURCING
- MANUFACTURING
- ASSEMBLY & PACKAGING
- LOGISTICS

We're here to help you every step of the way!

Logo Embossing

A photograph of two men in a workshop setting. On the left, a younger man in a white button-down shirt looks at a brown suede bag on a wooden table. On the right, an older man with glasses and a beard, wearing a dark sweater, holds a piece of leather and looks at a hand-drawn sketch of the bag. The background features a brick wall, a whiteboard with diagrams, and two large pendant lamps.

OUR DESIGN SERVICES

“From a sketch to a commercial and marketable product”

Our design team strives everyday to help our clients develop specific products or FULL collections. You may have an idea or some inspiration, but feel lost as to where to start. Don't worry, here is where we come in to help you! Our design team uses the support, research and direction provided by global authorities on consumer and design trends, that fulfill customer needs.

A black and white photograph of a workshop wall. The wall is covered in a perforated metal grid. Several tools are hanging on the grid, including a large rectangular frame, a long horizontal bar, and two vertical tools. The text "THE WORKSHOP" is overlaid in the center.

THE WORKSHOP

“Our state of the art technology is key in The process of developing challenging designs”

Our factory is fully equipped with the ultimate machinery specifically designed to fulfill the most demanding needs in design. We offer a wide variety of processes to make your ideas become reality:

- Laser cutting
- Embossing
- Perforation
- Embroidery
- Quilting
- Sewing
- Tooling

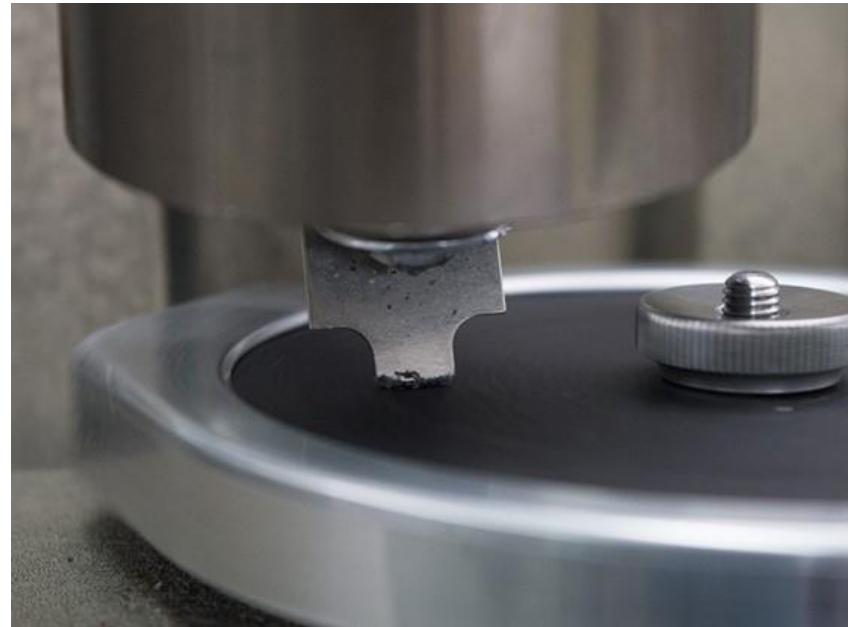

QUALITY

Our goal is to become a worldwide leader of the leather industry, with the highest possible quality standards.

➤ Quality System validations:

- IATF16949
- ISO9001
- ISO14001
- Silver rated Leather Working Group
- IEC 17025 Certified laboratory testing capability
- R&D and Lot to Lot verification testing of critical characteristics are performed at our laboratory every day.

MANUFACTURING FACILITY

- ✓ 2 laser cutting machines
- ✓ 2 embossing machines
- ✓ 2 computer multi-head embroidery machines (12/15 colors)

CONTINUOUS IMPROVEMENT THROUGH SUSTAINABLE ACTIONS

ACTIONS IN RESPONSIBLE SOURCING & SUSTAINABILITY

FERUS is committed to work with suppliers that are taking steps to reduce their environmental footprint and preserve the planet and its natural resources as well as transparency and accountability throughout all of our supply chain. The objective is to improve traceability and progressively increase the use of raw materials coming from responsible and well-managed sources.

Most of the raw materials used to create our products are renewable and come from nature, whether they are derived from animal, plant, or mineral sources. Our priorities are therefore to preserve resources including animal species, water, and energy, respect animal welfare, eliminate the use of hazardous chemicals, and reduce air and water pollution.

ACTION ON CLIMATE CHANGE

ISO 14001 Environmental Management Systems Certification, Solar energy, Natural light in facility, water recycling and less usage.

CONTINUOUS IMPROVEMENT THROUGH SUSTAINABLE ACTIONS.

MANUFACTURING PLANT SUSTAINABILITY

-Energy:

- Investment in Solar Powered electricity for for about 50% of consumption
- Eolic energy contract for rest of consumption
- All lighting at facilities are LED
- All facilities are Green Building technology, including Natural Sun Light utilization
- Crusting facility utilizes natural air-drying overhead conveyors

-Technology and Machinery

- All dryers and heaters are electric. Electric energy is much cleaner than boilers or gas.
- All finishing lines utilize roller finishing technology that consume aprox 30% less paint.
- All machinery is very efficient and less than 5 year old.

-Environment

- No emissions to the atmosphere.
- Internal wastewater plan with state of the art primary, secondary, biological, and ultra filtering.
- All water is reused either in our process or in watering our gardens.
- ISO14001 certification available.
- Zero Waste Mindset. Reduction of waste.

-Social Responsibility

- Trevino is very important for the community, Support of Nonprofit Organizations.
- Colleagues well being
- Sustainability reporting open and transparent to public
- Sub-supplier training on Sustainability Best Practices and expectations.
- Ethical Business Compliance (Mexican ESR Certification).

ACTIONS IN SOCIAL RESPONSIBILITY

FERUS is a company that respects the uniqueness of each employee and is committed to ensure a workplace that is founded on the principles of respecting differences and promoting inclusion. Support, inclusion, employment: FERUS maintains special ties with the local community in which we operate. We support our local community by contributing to improve access to education and job opportunities for young people as well as sports.

A photograph showing the components for 'Avocado Leather'. It includes a halved avocado with its pit, a whole avocado, a pile of orange-brown textured powder, and several large green leaves, all resting on a light-colored, textured surface that resembles leather. The background is a neutral, light brown color.

AVO LEATHER
A GREAT SOLUTION FOR A SUSTAINABLE
GENUINE LEATHER PRODUCT

FERUS has exclusive usage of Treviño's new AvoLeather®.

Trevino's AvoLeather® is one of the most environmentally friendly materials available for leather applications. Starting with the hide, which is a by-product of the meat industry, through the crust tanning stage which uses a waste product from the avocado packing industry, through Trevino's virtually fossil fuel free manufacturing, and self contained water treatment facility, makes Trevino's AvoLeather® an excellent alternative sustainable material.

Avocado seeds, skins and waste products from the avocado packing plants, provide the oils and tannins used to produce AvoLeather®. Utilizing the seeds and skins which typically end up in landfills significantly reduces the environmental impact of their disposal thereby cleaning the environment.

This leather is vegetable tanned with vegan extracts eliminating all chromium from the process thereby enhancing end-of-life disposal options.

THANK YOU

Don't hesitate in reaching out to us. We're happy to help and make your ideas become reality.
